

KODAK Info Input Solution

Outstanding Intelligent Document
Processing Solution

Kodak alaris

KODAK Info Input Solution has won a Buyers Lab (BLI) 2024 Pick Award for Outstanding Intelligent Document Processing Solution from Keypoint Intelligence thanks to its...

- Intuitive and easy user experience
- Third-party integration with OCR engines
- Visual classification that auto-recognizes and separates documents, then extracts specific information based on type
- Ability to extract and redact data from Word and Excel files as if they were a PDF
- Advanced Forms Designer, which optimizes indexing processes

In the fast-moving world in which we live, there are still a lot of obstacles we face that impede our progress at work. As a result, businesses are always trying to find the best ways to help move tasks forward, including through automation. When it comes to information-based processes, it can be laborious to digitize hardcopies. KODAK Info Input Solution's intelligent document process (IDP) capabilities empower users to process and extract data at high levels of accuracy, improving business efficiency and lowering costs for clients leveraging it.

"Between its ability to automate document processing, extraction, conversion, routing, and more, KODAK Info Input Solution helps to ensure that workers spend more time on valuable tasks and less time manually handling traditionally tedious tasks," said Keith Haas, Solutions Analyst in Keypoint Intelligence's Workplace Group. "KODAK stands out from the rest of the pack not only because of its IDP capabilities, but also its high-level of usability and customizable platform that makes it easy for regular users and administrators alike to make an integral part of workflows."

KODAK Info Input Solution is ideal for workers and businesses handling many tasks including, but not limited to, accounts payable, customer onboarding, insurance claims, and legal document review. The latest version of the solution adds quite a few useful new features that

increase the value proposition here: added support for the Microsoft Form Recognizer and Hyperscience engines for OCR extraction profiles; Google DocumentAI and Microsoft Azure Form Recognizers to be used as OCR Extraction engines; and support for ABBYY Vantage's OCR engine, Identity Provider and Single Sign-On Authentication, and more.

About Keypoint Intelligence

For over 60 years, clients in the digital imaging industry have relied on [Keypoint Intelligence](#) for independent hands-on testing, lab data, and extensive market research to drive their product and sales success. Keypoint Intelligence has been recognized as the industry's most trusted resource for unbiased information, analysis, and awards due to decades of analyst experience. Customers have harnessed this mission-critical knowledge for strategic decision-making, daily sales enablement, and operational excellence to improve business goals and increase bottom lines. With a central focus on clients, Keypoint Intelligence continues to evolve as the industry changes by expanding offerings and updating methods, while intimately understanding and serving manufacturers', channels', and their customers' transformation in the digital printing and imaging sector.

About BLI Smart Workplace Software Pick Awards

Based on exhaustive questionnaires, in-depth interviews, and a proprietary rating scale, Buyers Lab Pacesetter Awards recognize those document imaging OEMs that have shown market leadership in a variety of categories, including technologies, services, and key vertical markets.
